

Company Profile

*Technology for Green
Building Materials*

2K Technologies (2K) is India's premier source of technology and expertise for the building products sector.

Established in September 2000, the company has been given direction by two high caliber promoters who served India's building products sector for more than 4 decades and presently have more than 45 years of experience in designing, manufacturing and developing technologies for building products plants and equipment. Having rose through the ranks from shift engineers to vice president levels before starting the company, the leadership 2K follows is indisputable.

Among their skills and achievements are several patents, high profile consulting assignments and involvement in R&D activities leading to proprietary processes and patented products that are currently being manufactured on a commercial scale in India and in the International market.

2K employs a team of highly experienced engineers who hail from the building products industry and bring extensive experience with them in areas ranging from design, manufacture, procurement, consulting and R&D who bring over 400 man years of experience from the building products industry to the company.

We believe our customers are testimony to our accomplishments, and in their progress lies our success!

Plants, Technology & Services

Technology for Green Building Materials

Products and Industries Served

2K specializes in design, consulting and manufacturing of plant and equipment for insulation and building products. Their key focus is on the following industries for which turnkey plants can be offered:

- Corrugated and Flat Asbestos Cement Sheets and Accessories
- Non-Asbestos Flat Sheets for Interior/Exterior Application (Fiber Cement Board)
- Calcium Silicate Boards and Flat Sheets
- Fire Rated, Plain and Decorative Building Boards
- Asbestos/Non-Asbestos Sandwich Building Panels/Lightweight Concrete Panels
- A.C. Molded Goods (Fittings like Ridges, Gutters, etc.) by Injection Molding
- Sandwiched Solid Surface – Non Porous Homogenous Composite Surfacing Material (Patented)
- Aerated Autoclaved Concrete Blocks & Panels (AAC Blocks)
- Calcium Silicate Insulation Blocks
- Lightweight Calcium Silicate Ceiling Tiles
- Asphaltic Roofing Sheets

Technology Providers to the Building Products Industry

Services

2K with its competent and experienced work force has the following services to offer:

- Plant Design
- Process Design
- Troubleshooting
- Process Automation
- Waste Reduction
- Product Value Addition
- Production Optimization
- Energy Audit

Agencies, Alliances & Affiliations

Agencies & Alliances

2K is associated with International companies as their agents/representatives for India/South Asia:

- **SAMA Mineracoes Associadas ► Brazil**

www.sama.com.br

SAMA is one of the three world's largest producers of chrysotile asbestos fiber. The company is responsible for 10% of the whole amount of fiber marketed in the world.

- **SYRO Engineering ► Switzerland**

www.syroengineering.com

SYRO provides the fiber cement industry all around the world since decades with state of the art and high-quality products such as:

- ◆ Steel Moulds (flat, corrugated/waved, structured)
- ◆ Machinery (oil spraying systems, embossing systems, format drums, etc.)
- ◆ Engineering Solutions
- ◆ Consulting Services

- **CemTec Beratung GmbH ► Switzerland**

Technical support for fiber cement & NT technology.

Affiliations

2K is affiliated with the following organizations by way of professional membership or registration:
